

Kyle Piontek

Senior Full Stack Developer

hello@kylepiontek.com | (802) 558-8826 | Montpelier, VT
linkedin.com/in/kyle-piontek | github.com/kpiontek | kylepiontek.com

Senior full-stack engineer with 15 years of experience building customer-facing software with React, TypeScript, Node.js, PHP, Drupal, and SQL. Built the payments and escrow system for a marketplace serving 500,000+ users, maintained 120+ production web applications for the State of Vermont, and took an enterprise platform from unreliable releases to a monthly schedule. I use AI tools heavily for speed, but automated tests, repository hooks, and my own review decide what ships.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, SQL, Rust

Frontend: React, Next.js, Astro, Vite, Tailwind, Sass, Bootstrap, jQuery, HTML, CSS, WCAG accessibility

Backend, APIs & Data: Node.js, REST, GraphQL, MySQL, PostgreSQL, Supabase, Redis, Solr, Varnish, Symfony, caching and query optimization

CMS & Platforms: Drupal 6-11 (headless and traditional), WordPress, Acquia Cloud

AI-Native Development: Claude Code and Codex as primary development tools, agent-driven multi-file refactors and migrations, MCP server design, CLAUDE.md and AGENTS.md context and rules files, deterministic guardrails and git hooks gating generated code

Infrastructure & Quality: Git, Docker, GitHub Actions CI/CD, Vitest, Playwright, Cloudflare (Workers, Pages, D1, R2), Tauri, Apple notarization, Azure Trusted Signing

PROFESSIONAL EXPERIENCE

Senior Web Developer

May 2025 – Present

Digital Artisans

Remote

- Own full-stack features across the data model, GraphQL API, and React UI for an enterprise Drupal platform serving hundreds of thousands of visits each month.
- Took over a delayed project after two vendor handoffs, stabilized the codebase, and restored a monthly release schedule for a three-developer team.
- Cut monthly production release time from several hours to one hour or less.
- Work with the lead architect on system design and refactor legacy code while keeping production stable.

Full Stack Web Developer

Apr 2024 – Apr 2025

Optiv Security

Remote

- Cut page load times by nearly 50% by optimizing backend code, reducing frontend scripts, and improving caching.
- Filled in for the Lead Technical Architect and reviewed technical plans for high-traffic marketing sites before implementation.
- Worked with design, marketing, and executives to prioritize work for a fixed release calendar.

Software Engineer

Jun 2020 – Apr 2024

Tyler Technologies

Montpelier, VT

- Built and maintained 120+ production web applications for the State of Vermont, with accessibility and public-sector requirements included in every release.
- Migrated legacy PHP applications to a modern Drupal architecture with zero agency downtime.
- Handled technical decisions and release planning when the Director of Development was unavailable.
- Mentored junior developers and reviewed code across a large application portfolio.

Full Stack Engineer*CashorTrade.org*

Feb 2019 – Jun 2020

Burlington, VT

- Built core features for a ticket marketplace serving 500,000+ users as part of a small startup engineering team.
- Designed and built the payments and escrow system that made paid transactions possible, including fund holds, releases, and dispute workflows, more than doubling company revenue.
- Reduced API response times by 30% through query and endpoint optimization.

Front-End Engineer*Bluehouse Group*

Feb 2017 – Feb 2019

Burlington, VT

- Built React, WordPress, and custom PHP applications for 10+ clients.
- Set the team's WCAG 2.0 accessibility standards and review process.
- Delivered projects under budget, contributing to more than 10% annual revenue growth.

PROJECTS

Founder & Engineer (Part-Time)*Brambleworks LLC*

2026 – Present

Montpelier, VT

- [SiteCMD](https://sitecmd.com) (sitecmd.com): Built a local-first desktop website scanner with 420+ checks across live sites and source code. The application uses a Rust backend and a React/TypeScript frontend on Tauri; sitecmd.com runs on Astro and Cloudflare Workers.
- Set up a GitHub Actions release pipeline for signed, notarized macOS and Windows builds.
- Built SiteCMD Connect, the hosted service: seven Cloudflare Workers on Durable Objects, Queues, D1, and R2, with OIDC-attested CI tokens and Linear, Jira, and GitHub issue mirroring, live in production within its first week.
- [Was It Vibed?](https://wasitvibed.com) (wasitvibed.com): Built and launched a Cloudflare Worker that analyzes public HTML and CSS across 46 deterministic signals for AI-generated patterns.
- [Visit Your Team](https://visityourteam.com) (visityourteam.com): Launched and now operate a Next.js site on Cloudflare covering all 124 NFL, NBA, NHL, and MLB teams. It includes real pricing and a trip-cost calculator and attracts 5,000+ monthly visitors, mainly from organic search.
- [SmartHomeU](https://smarthomeu.com) (smarthomeu.com): Launched and operate a smart home education site with 22 free courses, product reviews, and live retail price tracking, built on Drupal 11 with a custom Node.js scraping service.

EARLIER EXPERIENCE

Full Stack Engineer (Contract)*Blue Coda*

Jun 2014 – Jun 2016

Cambridge, MA

- Built a medical industry platform and REST API integrations for video library management.

Web Developer (Contract)*Hark Digital*

Jun 2013 – Jun 2014

Burlington, VT

- Became the sole developer two weeks into the contract and handled all client projects, including custom Drupal sites.

Web Developer*Red Barn Media Group*

Oct 2011 – Jun 2013

Charlotte, VT

- Built a shared website platform for local HVAC companies and Drupal and custom PHP applications for Fortune 500 clients.

EDUCATION

Computer Science Coursework | University of Vermont

2009 – 2011

Management Information Systems Coursework | West Virginia University

2008 – 2009
