

Kyle Piontek

Senior Full Stack Engineer

✉ hello@kylepiontek.com ☎ (802) 558-8826 📍 Montpelier, VT

🌐 kylepiontek.com 🐙 github.com/kpiontek 🔗 linkedin.com/in/kyle-piontek

Self-taught full-stack developer. I started programming at age 12, left college to work, and have spent 15 years building and fixing websites and web apps for agencies, state government, startups, and enterprise teams. These days I also build my own products on nights and weekends. Claude Code and Codex help me move faster, but tests, git hooks, and my own review decide what ships.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, Rust, SQL, HTML, CSS

Frontend: React, Next.js, Astro, Preact, Tailwind, Sass, responsive design, technical SEO, WCAG accessibility

Backend & APIs: Node.js, GraphQL, REST, API design, OAuth and OIDC, webhooks, Stripe

Data & CMS: MySQL, PostgreSQL, Redis, Supabase, data modeling, caching and query optimization, Drupal, WordPress, headless CMS

Infrastructure & Tooling: Cloudflare (Workers, Pages, D1, R2, Queues, Durable Objects), Acquia Cloud, Linux, Docker, Git, GitHub Actions CI/CD, Vitest, Playwright, Tauri

AI Engineering: Claude Code, Codex, spec-driven development, TDD, cross-model code review, MCP servers, agent skills and rules files, guardrails and git hooks that gate generated code

WORK HISTORY

Senior Web Developer

May 2025 – Present

Digital Artisans - Remote

- Joined a project that was already late after two vendor handoffs, got the codebase stable, and got a small team back to a monthly release schedule.
- Cut each monthly production release from several hours to less than an hour.
- Work across the whole stack of an enterprise Drupal platform with hundreds of thousands of visits a month: the data model, the GraphQL API, and the React front end.
- Work with the lead architect on system design and clean up legacy code without breaking production.

Full Stack Web Developer

Apr 2024 – Apr 2025

Optiv Security - Remote

- Cut page load times on Optiv's Drupal 10 marketing sites by nearly half by fixing slow backend code, removing unneeded front-end scripts, and improving caching.
- Backed up the Lead Technical Architect and reviewed technical plans before work started.
- Turned designs into responsive components on a fixed release calendar with design, marketing, and leadership.

Software Engineer

Jun 2020 – Apr 2024

Tyler Technologies - Montpelier, VT

- Built and maintained 120+ Drupal websites for State of Vermont agencies, from Drupal 7 through 10.
- Led the migration of legacy PHP applications onto Drupal 10.
- Backed up the Director of Development, covering planning and technical decisions when he was out.
- Mentored junior developers and reviewed their code.

Full Stack Engineer

Feb 2019 – Jun 2020

CashorTrade.org - Burlington, VT

- Designed and built the payment and escrow system that turned the platform from a passion project into a viable business.
- Worked closely with the founder to plan and prioritize features for 500,000+ users.
- Inherited a five-year-old codebase with significant technical debt, improving the legacy architecture while continuing to deliver new features.
- Optimized database queries and API performance, reducing response times by 30%.

Front-End Engineer

Feb 2017 – Feb 2019

Bluehouse Group - Burlington, VT

- Built sites for 10+ clients in SilverStripe, WordPress, React, and custom PHP, and learned SilverStripe on the job.
- Led the team's move to WCAG 2.0 accessibility.
- Ran my own projects on a developer-heavy team with one project manager.

PROJECTS

- [SiteCMD \(sitecmd.com\)](https://sitecmd.com): Website scanner with 420+ deterministic checks that hands exact fixes to the developer's AI editor. Shipped as an open-source Rust and React desktop app with a CLI and MCP server, now being ported to a Cloudflare Workers web app that tracks a site's scans, uptime, analytics, and search in one report.
- [Was It Vibed? \(wasitvibed.com\)](https://wasitvibed.com): Public scanner that estimates whether a site was vibe-coded across 46 deterministic signals, with no AI in the scoring. Cloudflare Workers with D1, Durable Objects rate limiting, Turnstile, and SSRF-safe URL fetching.
- [Visit Your Team \(visityourteam.com\)](https://visityourteam.com): Game-day planning guide for all 124 NFL, NBA, NHL, and MLB teams, with real prices and a trip cost calculator across about 1,165 statically generated pages. Next.js and Supabase on Cloudflare, drawing 5,000+ monthly visitors, mostly from organic search.
- [SmartHomeU \(smarthomeu.com\)](https://smarthomeu.com): Smart home education site with 22 free courses and 112 lessons, plus a product database kept current by a Node.js and Puppeteer price-scraping service. Drupal 11.

EARLIER EXPERIENCE

Full Stack Engineer (Contract)

Jun 2014 – Jun 2016

Blue Coda - Cambridge, MA

- Lead developer on a Drupal 7 platform for a medical company, with REST API integrations to manage its video library.

Web Developer (Contract)

Jun 2013 – Jun 2014

Hark Digital - Burlington, VT

- Two weeks into the contract, the lead developer went on indefinite leave and handed everything to me, so I ran development and project management for every client project.

Web Developer

Oct 2011 – Jun 2013

Red Barn Media Group - Charlotte, VT

- Built Drupal and custom PHP sites for Fortune 500 clients and a shared website platform for local HVAC companies.

EDUCATION

Computer Science Coursework | University of Vermont

2009 – 2011

Management Information Systems Coursework | West Virginia University

2008 – 2009
